EXPERIENCE

Monobanda

Lead Programmer / June 2025 - January 2026

Gameplay and Shader Programmer / January 2024 - February 2025

- Shipped award winning games such as SoulPaint, Deep, Call of The Void, Ritme Robot
- Directed critical architectural design decisions in my role as lead programmer
- Engineered low level audio backend systems and rendering pipelines

Trixel Creative LLC

Gameplay Programmer / November 2021 - May 2022

- Engineered gameplay mechanics and internal developer tools for Restitched using C#/Unity
- Contributed to a highly anticipated indie title ranking among the top wishlisted games on Steam

EDUCATION

Grafisch Lyceum Utrecht / **Bachelor Software Development** / August 2021 - August 2025

Niftarlake College / **Higher General Secondary Education** / August 2018 - August 2021

PROJECTS

Voxel Engine / **Volumetric Voxel Ray Tracer** / August 2022 - Present

- Built a highly optimized volumetric ray tracer from scratch using C#/OpenGL, capable of processing millions of rays per second, while maintaining fully dynamic geometry.

Concrete / **Unity-Like Game Engine** / May 2024 - Present

- Designed a custom general purpose game engine and editor architecture mimicking Unity's Entity-Component-System (ECS) to simplify game logic development.

Fluid Simulation / **Smoothed Particle Hydrodynamics (SPH)** / January 2025 - Present

- Developed a real-time SPH fluid simulation that utilized efficient multithreading to offload mathematical calculations to many cores, significantly improving performance.

C++ for C# devs / **Programming Book** / January 2025 - Present

- Authored a comprehensive technical guide bridging C# paradigms with C++ architecture.

A Guide to the Odin language / **Programming Book** / June 2026 - Present

- Writing an advanced Odin guide for experienced programmers.

SKILLS AND TOOLS

Programming Languages:

C / C++ / C# / Go / Odin / Jai / Bash / Powershell

Frameworks & Other Tools:

Unity / Godot / OpenGL/ SDL3 / Linux
